

SARTHAK PATEL

SOFTWARE DEVELOPER & SYSTEMS SPECIALIST

Ottawa, ON, Canada • 437-962-2643 • sarthakpatel.sv@gmail.com •  LinkedIn •  Portfolio

EXECUTIVE SUMMARY

Computer Programming graduate from Algonquin College with hands-on experience in full-stack software development, REST API architecture, systems troubleshooting, and local AI/LLM integration. Proven track record of configuring remote access utilities, building local microservices, and leading client capstone projects. Combines technical capability across Python, Java, JavaScript, and Linux with customer support experience, strong communication skills, and a practical problem-solving mindset.

TECHNICAL COMPETENCIES

Languages & Web:	Python, Java, JavaScript, TypeScript, SQL, Dart, FastAPI, Spring Boot, Node.js, Next.js, React, REST APIs
Systems & Support:	Windows OS, Linux CLI, Remote Utilities, Network Port Configuration, Tailscale, Ngrok, Systems Troubleshooting
Databases & Tools:	MySQL, Oracle SQL, Supabase, PostgreSQL, SQL Server, MongoDB, Neo4j, XAMPP, Git, GitHub, VS Code
AI & Embedded:	Ollama (Qwen 3.5), Local LLM Pipelines, Prompt Engineering, Arduino (Uno/Nano/Mega), Sensors, 3D Printing / CAD

TECHNICAL & ENGINEERING PROJECTS

Scout AI / Scout_Content_OS

Aug 2025 – Present

Personal AI Platform | Next.js, FastAPI, Python, Ollama, Qwen 3.5, REST APIs

- Architected a local-first automation OS connecting Next.js dashboards and FastAPI backend microservices to local LLM execution environments.
- Engineered automated execution pipelines, structured prompt logic, and output validation to eliminate bottlenecks and ensure data reliability.

Legion Remote

Personal System Project

Systems Access Utility | Python, Windows OS, Tailscale, Ngrok, Localtunnel, REST APIs

- Built a custom remote control utility for Windows environments using Python scripts and REST communication protocols.
- Configured local service endpoints, port connectivity, and secure tunneling endpoints (Tailscale, Ngrok) for low-latency device control.

CurvyGirlExchange / Plus Closet

Academic Client Project

Algonquin College Capstone (Team of 4) | Python, MySQL, Supabase, REST APIs, 3D Modeling

- Translated client business requirements into functional application specifications, backend logic, and database schemas (MySQL/Supabase).
- Engineered recommendation algorithms for personalized fit prediction and integrated 3D avatar body-modeling features.

IoT & Hardware Computing Systems

Embedded Hardware Projects

Microcontroller Firmware & Sensor Integration | Arduino (Uno/Nano/Mega), Embedded C/C++, Sensors, 3D Printing

- Smart Safety Helmet:** Developed industrial hazard alert prototype using Arduino, MQ-2 gas/smoke sensor, and audible/visual alarms.
- RFID Attendance & Bipedal Robot:** Built standalone RFID user logging device and programmed 3D-printed Otto walking robot with ultrasonic navigation.

CUSTOMER SUPPORT & OPERATIONS

Retail & Customer Support Associate

Ottawa & Kanata, ON | Jan 2024 – Apr 2026

Loblaws, Home Depot, Farm Boy

- Delivered client-facing customer service, resolving inquiries and explaining technical product details with patience and active listening.
- Maintained smooth daily operations and high service standards across fast-paced environments while collaborating in cross-functional teams.

EDUCATION & CERTIFICATION

Algonquin College

Ottawa, Ontario

Computer Programming – 2-Year Ontario College Diploma

Graduated: May 2026
